IT Experience

IT Intern, Settlers Hospitality Group

5/25/25 – 08/19/25

- Provided IT support for a hospitality organization with 100+ employees across multiple hotels, restaurants, and business properties.
- Implemented physical security solutions, including security cameras, smart locks, and access control systems while ensuring compliance with applicable regulations.
- Supported the successful technology transition of a newly acquired restaurant by deploying and integrating new POS hardware and software under strict operational deadlines.
- Worked independently and alongside the Director of IT to troubleshoot hardware, software, networking, and operational technology issues across multiple business locations.

Project Experience

- Worked with an automated alcoholic beverage dispenser company to help manage digital advertising content displayed on different dispensers. Gained experience using Codex to filter and create a dynamic database.
- Created a Weather-App using Java, XML, and the use of Access databases. Implemented GUI methods, database records, and modified statistics in the database.
- Coordinated a 4-member team project for a streaming service database and functionality. Microsoft Visio and Access were used to create an ERD to present.
- Created and organized legal documentation for a three-member team which was responsible for creating a proposal to design and develop a privacy policy for a health care corporation.
- Used Visual Studio and Dreamweaver to create a personalized webpage for my resume using CSS and HTML.

Experience

Peer Mentor, Penn State Scranton

9/18/23 – 12/5/25
